複素解析的力学系のトポロジーとその周辺
Topology of Holomorphic Dynamical Systems and Related Topics

1995年10月24日～10月27日 (October 24-27, 1995)

研究代表者 伊藤 敏和(Toshikazu Ito)

目 次(Contents)

1.	Indices and residues of holomorphic vector fields on singular varieties	1
	北大・理 諏訪 立雄(Tatsuo Suwa)	
2.	Residue formulas for singular foliations defined by meromorphic functions on surfaces	8
	北大・理 本田 知亮(Tomoaki Honda)	
3.	The symplectic nature of the space of projective connections on Riemann surfaces	16
	京大数理研 河井 真吾(Shingo Kawai)	
4.	A generalization of the Morita-Mumford classes to extended mapping class groups for surfaces	28
	北大・理 河澄 響矢(Nariya Kawazumi)	
5.	Indices of vector fields and residues of singular foliations after Nash transformation	39
	IML-CNRS Jean-Paul Brasselet	
6.	Singularities of finite formal type for foliations of $(C^2, 0)$	46
	Université Paul Sabatier J.F. Mattei and E. Salem	
7.	The structure of the singular set of a complex analytic foliation	66
	北大・理 吉崎 純也(Junya Yoshizaki)	
8.	The number of compact leaves of a one-dimensional foliation on the $2n-1$ dimensional sphere S^{2n-1} associated with a holomorphic vector field	75
	龍谷大・経済 伊藤 敏和(Toshikazu Ito)	
9.	Non-vanishing Wronskian determinants and Riemann problem for hypergeometric function F_D	80
	滋賀医大 寺田 俊明(Toshiaki Terada)	
10.	On the irregular singularities of confluent hypergeometric D-modules	93
	お茶の水女子大・理 真島 秀行(Hideyuki Majima)	

11. Curvature of curvilinear 4-webs and pencils of one forms	109
北大・理 中居 功(Isao Nakai)	
12. Triangulations of integral polytopes, examples and problems	133
University of Paris VII Jean-Michel Kantor	
13. Two transforms of plane curves and their fundamental groups	145
都立大・理 岡 陸雄(Mutsuo Oka)
