# 解析的整数論

京都大学数理解析研究所

1996年8月

RIMS Kokyuroku 958

# Analytic Number Theory

August, 1996

Research Institute for Mathematical Sciences

Kyoto University, Kyoto, Japan

解析的整数論  
研究集会報告集

1994年10月 3日~10月 7日

研究代表者 本橋 洋一(Yoichi Motohashi)

目 次

1. EXTREMAL PROBLEMS IN SIEVE THEORY-----	1
Univ. of Illinois      A. Hildebrand	
2. On the Average of the Least Primitive Root Modulo $p$ -----	10
明治学院大・一般教育      村田 玲音(Leo Murata)	
3. Some Sums involving Farey fractions-----	14
近畿大・九州工      金光 滋(Shigeru Kanemitsu)	
4. SPECIALIZATIONS OF ENDOMORPHISM RINGS OF ABELIAN VARIETIES-----	23
Univ. Basel      D. W. Masser	
5. Value Distribution Theory over Function Fields and a Diophantine Equation-----	33
東工大・理      野口 潤次郎(Junjiro Noguchi)	
6. A note on the multiple elliptic Dedekind sum-----	43
富山大・工      江上 繁樹(Shigeki Egami)	
7. Eisenstein cocycles for arithmetic groups and values of zeta functions-----	46
九大・理      Robert Sczech	
8. A remark on almost uniform distribution modulo 1-----	49
新潟大・理      秋山 茂樹(Shigeki Akiyama)	
9. ON THE SOLUTIONS OF THUE EQUATIONS-----	56
東北大・理      藤森 雅巳(Masami Fujimori)	
10. Simultaneous Approximations and Dynamical Systems (On the simultaneous approximation of $(\alpha, \alpha^2)$ satisfying $\alpha^3 + k\alpha - 1 = 0$ )-----	59
津田塾大      伊藤 俊次(Shunji Ito)	
11. APPLICATIONS OF UNIT EQUATIONS-----	62
Debrecen Univ.      K. Györy	
12. A metrical result on transcendence measures in certain fields-----	79
群馬大・工      天羽 雅昭(Masaaki Amou)	

13. DIOPHANTINE APPROXIMATION ON ELLIPTIC CURVES-----	82
日大・理工                平田 典子(Noriko Hirata-Kohno)	
14. EXTENDED FORMAL POWER SERIES AND G-FUNCTIONS-----	90
鳥取大・教育                原瀬 巍(Takashi Harase)	
15. A GENERALIZATION OF THE SIZES OF DIFFERENTIAL EQUATIONS AND ITS APPLICATIONS TO G-FUNCTION THEORY-----	93
東工大・理                永田 誠(Makoto Nagata)	
16. DISTRIBUTION OF RATIONAL POINTS ON FANO VARIETIES-----	98
Max-Planck-Institut        Yu. I. Manin	
17. MINIMUM OF POSITIVE DEFINITE QUADRATIC FORMS-----	105
名大・理                    北岡 良之(Yoshiyuki Kitaoka)	
18. The Remainder Term in the Dirichlet Divisor Problem-----	111
The Univ. of Hong Kong    Kai-Man Tsang	
19. Sum of Kloosterman zeta functions-----	120
名大・理                    谷川 好男(Yoshio Tanigawa)	
20. On the Sato Conjecture for QM-curves of genus two-----	129
早稲田大・理工            角皆 宏(Hiroshi Tsunogai)	
21. An application of Mellin-Barnes' type integrals to the mean square of L-functions-----	141
鹿児島大・理                桂田 昌紀(Masanori Katsurada)	
22. Siegel modular forms: estimates for eigenvalues and Fourier coefficients-----	152
Univ. Heidelberg            Winfried Kohnen	
23. ASYMPTOTIC SERIES FOR DOUBLE ZETA AND DOUBLE GAMMA FUNCTIONS OF BARNES-----	162
岩手大・教育                松本 耕二(Kohji Matsumoto)	
24. The Riemann Zeta-Function and the Hecke Congruence Subgroups-----	166
日大・理工                    本橋 洋一(Yoichi Motohashi)
