Preface

This volume is a collection of papers presented at the symposium on mathematical economics sponsored by the Research Institute for Mathematical Sciences, Kyoto University, which was held during November 18 ~ 20, 2005.

On behalf of the programme committee, I would like to extend my cordial thanks to all the participants of the symposium for their sincere and constructive contributions to our project.

We can safely say that mathematical reasonings have been playing a much more indispensable roles in economic theory than in any other discipline of social sciences. There seems to be several reasons which have endowed economic theory with peculiar mathematical characters.

First of all, many economic phenomena permit expressions in terms of quantitative languages.

We have also to take account of the fact that an economy consists of a huge number of sectors which are entangled in a complex manner. Economic phenomena result from the interactions of these interdependent component sectors. Their mutual relation is so complicated that an ordinary language and a casual way of thinking have only very limited abilities to describe and analyze economic phenomena. It is quite easy for anyone to imagine serious confusions which would result if we had recourse exclusively to ordinary languages and casual reasonings. Although mathematical reasonings may sometimes seem too round-about for our purposes, it certainly provides economists with simple and efficient analytical weapons.

Furthermore economists have been suffering from the difficulty of controlled experiments in their researches. That is exactly why much importance has been attached to rigorous speculative experiments in economic theory. So called "axiomatic method" developed in Vienna during the inter-war period should be regarded as being promoted by the same view and recognition under the influence of D. Hilbert.

I would be pleased very much if our symposium could contribute to widening and deepening of the mathematical foundations in economic theory.

目 次 (*speaker)

I. Analytical Foundations of Economic Theory	
1. The Golden Trinity — Optimality, Inequality and Identity —	1
九大・経済学	岩本 誠一 (Seiichi Iwamoto)
2. On Nondeterministic Dynamic Programming	15
九工大・工	藤田 敏治 (Toshiharu Fujita)
II. Aspects of Equilibrium Theory	
3. Homological Methods for the Economic Equilibrium Existence Problem: Coincidence Theorem and an Analogue of Sperner's Lemma in Nikaido (1959) ----- 25	
阪大・経済学	浦井 憲 (Ken Urai)
4. EXISTENCE OF EQUILIBRIA FOR AN ABSTRACT SOCIETY WITH N SOCIAL GROUPS ----- 53	
関西大・経済	坂根 宏一 (Hirokazu Sakane)
5. Representation of Convex Preference in a Measure Space: Pareto Optimality and Core in Cake Division ----- 60	
法政大・経済	佐柄 信純 (Nobusumi Sagara) *
京都情報大学院大	Milan Vlach
6. Stability, Chaos and Multiple Attractors: A Single Agent Makes a Difference ----- 77	
青森公立大・経営経済	小野崎 保 (Tamotsu Onozaki) *
TU Braunschweig	Gernot Sieg
岡山大・経済	横尾 昌紀 (Masanori Yokoo)
III. Dynamic Macro-economic Theory	
7. Growth and Habit Formation: the case of endogenous technical change ----- 79	
京産大・経済学	土居 潤子 (Junko Doi) *
阪大・経済学	三野 和雄 (Kazuo Mino)
8. Technological Change and Wage Inequality in the Increase of Service Economy ----- 95	
姫路獨協大・経済情報	室 和伸 (Kazunobu Muro)
神戸大・経済学	中村 保 (Tamotsu Nakamura) *

9.	The emergence of economic fluctuations and the possibility of economic slumps: Two sticky-price models -----	108
	日大・経済学	吉田 博之 (Hiroyuki Yoshida)
IV. Mathematical Finance		
1 0.	Swaption Price by General Gram-Charlier Expansion -----	116
	京大・経済学	田中 敬一 (Keiichi Tanaka)
1 1.	Optimal Stopping Problems for a Process with a Jump -----	123
	日銀・金融研	室井 芳史 (Yoshifumi Muroi)
1 2.	Nonsynchronously observed diffusions and covariance estimation -----	130
	Columbia Univ. / 慶應大・ビジネススクール	林 高樹 (Takaki Hayashi) *
	東大・数理科学	吉田 朋広 (Nakahiro Yoshida)
1 3.	A summary on the approximate approach to the exponential utility indifference valuation -----	140
	慶應大・経済学	新井 拓児 (Takuji Arai)
V. Game Theory		
1 4.	THE DAWN OF MODERN THEORY OF GAMES - SUMMARY -----	150
	慶應大・経済学	中山 幹夫 (Mikio Nakayama)
1 5.	Efficiency and Diversity in Voluntarily Repeated Prisoner's Dilemma -----	156
	慶應大・経済学	グレーヴァ 香子 (Takako Fujiwara-Greve) *
	東大・経済学	奥野-藤原 正寛 (Masahiro Okuno-Fujiwara)
1 6.	On Characterization of Nash Equilibrium Strategy of Bi-matrix Games with Fuzzy Payoffs -----	177
	金沢大・経済	前田 隆 (Takashi Maeda)
1 7.	Equilibrium Refinement Problems in Cheap-talk Games -----	186
	明治安田生命	白瀧 絵理 (Eri Shirataki) *
	筑波大・システム情報工学	石川 竜一郎 (Ryuichiro Ishikawa)
1 8.	Résumé: "A Simple Holdup Model with Two-sided Investments: the Case of Common-Purpose Investments" -----	195
	京大・経済研	花菌 誠 (Makoto Hanazono)
1 9.	Excess Information and Tragedy of the Commons: A Summary -----	200
	慶應大・経済学	細矢 祐誉 (Yuhki Hosoya)

2 0 . Macroeconomic Implications of Coordination Failure in a Multisector	
Cournot-Nash Model -----	202
名大・経済学	河合 伸 (Shin Kawai) *
"	皆川 正 (Tadashi Minagawa)
2 1 . On the Existence of Strategy-proof Social Choice Correspondences -----	216
慶應大・経済学	佐藤 伸 (Shin Sato)
