Documenta Mathematica

Journal der Deutschen Mathematiker-Vereinigung

Band 3, 1998

Peter Heinzner
The Minimum Principle
from a Hamiltonian Point of View 1–14

Stefan Kebekus
Simple Models
of Quasihomogeneous Projective 3-Folds 15–26

Annette Huber, Jörg Wildeshaus
Classical Motivic Polylogarithm
According to Beilinson and Deligne 27–133

Vladimir Chernousov
An Alternative Proof of Scheiderer's Theorem
on the Hasse Principle
for Principal Homogeneous Spaces 135–148

Meike Schäffler
Partition Regular Systems
of Linear Inequalities 149–187

Detlev W. Hoffmann and Jean-Pierre Tignol
On 14-dimensional quadratic forms in I^3,
8-dimensional forms in I^2,
and the common value property 189–214

Marc A. Rieffel
Metrics on States from Actions of Compact Groups 215–230

Bernhard Keller
On the Cyclic Homology
of Ringed Spaces and Schemes 231–259

Michael Scheutzow, Heinrich v. Weizsäcker
Which Moments of a Logarithmic Derivative
Imply Quasiinvariance? 261–272

Haruzo Hida
Global Quadratic Units and Hecke Algebras 273–284

Erez M. Lapid
A note on the Global Langlands Conjecture 285–296

Annette Huber, Jörg Wildeshaus
Correction to the Paper
"Classical Motivic Polylogarithm
According to Beilinson and Deligne" 297–299

Annette Werner
Local Heights on Abelian Varieties
and Rigid Analytic Uniformization 301–319

Mina Teicher
Chern Classes of Fibered Products of Surfaces 321–332

M. S. Abual-Rub
Long Range Diffusion Reaction Model
on Population Dynamics 333–340

Oleg T. Izhboldin
Motivic Equivalence of Quadratic Forms 341–351

Volker Bach, Jean-Marie Barbaroux,
Bernard Helffer, Heinz Siedentop
Stability of Matter for the Hartree-Fock Functional
of the Relativistic Electron-Positron Field 353–364
