

# CONTENTS

Neal Bez · · · · ·	1
Heat-flow monotonicity underlying some sharp inequalities in geometric and harmonic analysis	
Jun Kato and Tohru Ozawa · · · · ·	17
A remark on global solutions to nonlinear Klein-Gordon equation with a special quadratic nonlinearity in two space dimensions	
Hideo Kozono and Taku Yanagisawa · · · · ·	27
Global DIV-CURL Lemma in 3D bounded domains	
Shigehiko Kuratsubo · · · · ·	35
On an extension of the Voronoï-Hardy identity and multiple Fourier series	
Satoshi Masaki · · · · ·	53
Remarks on global existence of classical solution to multi-dimensional compressible euler-poisson equations with geometrical symmetry	
Takayoshi Ogawa · · · · ·	87
Drift-diffusion system in the critical case	
Michael Ruzhansky and Mitsuru Sugimoto · · · · ·	103
On the smoothing properties of dispersive partial differential equations	
Hironobu Sasaki · · · · ·	125
Inverse scattering problems for dispersive equations with a non-local nonlinearity	
Shuichi Sato · · · · ·	155
On certain estimates of singular integrals useful for extrapolation	
Kotaro Tsugawa · · · · ·	163
Well-posedness for quadratic nonlinear Schrödinger equations
