

## Contents

Indivisibility of special values of zeta functions associated to real quadratic fields Iwao Kimura .....	7
A determinant formula for the quotient of the relative class numbers of imaginary abelian number fields of relative degree 2 Mikihito Hirabayashi .....	21
On "M-functions" closely related to the distribution of $L'/L$ -values Yasutaka Ihara .....	35
Kronecker limit formula for real quadratic fields and Shintani invariant Shuji Yamamoto .....	45
On the applications of Shimura's mass formula Manabu Murata .....	51
Algebraic theta functions and Eisenstein-Kronecker numbers Kenichi Bannai and Shinichi Kobayashi .....	63
Elliptic Gauss Sums and Hecke $L$ -values at $s = 1$ Tetsuya Asai .....	79
On several multiple zeta functions Tomio Kubota .....	123
On Galois representations of local fields with imperfect residue fields Kazuma Morita .....	131
Essential dimension of some twists of $\mu_{p^n}$ Gombodorj Bayarmagnai .....	145
Ramification and tame characters of a finite flat representation of rank two Shin Hattori .....	153

On the Galois images associated to QM-abelian surfaces	
Keisuke Arai	165
Self-points on an elliptic curve of conductor 14	
Christian Wuthrich	189
On the equivariant Tamagawa number conjecture for CM elliptic curves	
Masataka Chida	197
On unramified pro- $p$ Galois groups over cyclotomic $\mathbb{Z}_p$ -extensions — A survey	
Yasushi Mizusawa	223
The geometric Iwasawa conjecture from a viewpoint of the arithmetic topology	
Ken-ichi Sugiyama	235
