

Preface

This volume collects original papers written by the speakers of a RIMS Symposium “Harmonic Analysis and Nonlinear Partial Differential Equations,” held at Research Institute for Mathematical Sciences, Kyoto University, in July 4 - July 6, 2016.

The symposium “Harmonic Analysis and Nonlinear Partial Differential Equations” has been held annually at RIMS since 1997. Its purpose is to provide the opportunity for specialists in various areas of harmonic analysis and nonlinear partial differential equations to exchange ideas and the latest developments and to build networks.

Financial support from RIMS and JSPS Grant-in-Aid for Scientific Research JP24224003 and JP16H03943 is gratefully acknowledged.

Thanks are due to the referees for their efficient work.

April, 2017

Hideo Kubo and Hideo Takaoka

CONTENTS

Noboru Chikami · · · · ·	1
Some a priori estimate related to the well-posedness for the barotropic compressible Navier-Stokes system	
Jayson Cunanan and Yohei Tsutsui · · · · ·	23
Trace operators on various decomposition spaces	
Kunio Hidano · · · · ·	37
Regularity and lifespan of small solutions to systems of quasi-linear wave equations with multiple speeds, I: almost global existence	
Tomoya Kato · · · · ·	63
On applications of modulation spaces to dispersive equations	
Makoto Nakamura · · · · ·	79
Some effects of the spatial variance on the Cauchy problem for partial differential equations	
Hironobu Sasaki · · · · ·	91
Remark on the analytic smoothing effect for the Hartree equation	
Denny Ivanal Hakim, Shohei Nakamura and Yoshihiro Sawano · · · · ·	109
Weighted Morrey spaces—complex interpolation and the boundedness of the Hardy-Littlewood maximal operator	
Christopher D. Sogge · · · · ·	141
Localized L^p -estimates for eigenfunctions: II	
Akihiko Miyachi and Naohito Tomita · · · · ·	153
A remark on the unboundedness of the bilinear Hilbert transform on Hardy spaces	
Rodolfo H. Torres and Erika L. Ward · · · · ·	159
Several results in classical and modern harmonic analysis in mixed Lebesgue spaces
