

# Preface

This volume collects original papers written by the speakers of a RIMS symposium “Harmonic Analysis and Nonlinear Partial Differential Equations”, held at Research Institute for Mathematical Sciences, Kyoto University, in July 3 - July 5, 2017.

The symposium “Harmonic Analysis and Nonlinear Partial Differential Equations” has been held annually at RIMS since 1997. Its purpose is to provide the opportunity for specialists in various areas of harmonic analysis and nonlinear partial differential equations to exchange ideas and the latest developments and to build networks.

Financial support from RIMS and JSPS KAKENHI Grant Number 10322794 is gratefully acknowledged.

We would like to thank the speakers, all the participants and anonymous referees who have made the symposium successful and this proceeding scientific.

March, 2018

Hideo Takaoka and Hideo Kubo

# CONTENTS

Takahisa Inui .....	1
Remarks on the global dynamics for solutions with an infinite group invariance to the nonlinear Schrödinger equation	
Yehyun Kwon and Sanghyuk Lee .....	33
Sharp $L^p - L^q$ estimate for the spherical harmonic projection	
Gaku Hoshino .....	59
Analyticity of global solutions to the non-gauge invariant nonlinear Schrödinger equations	
Hiroaki Kikuchi .....	73
Remarks on scattering problem for a class of nonlinear Schrödinger equations	
Dodson Benjamin .....	93
Scattering for the defocusing, cubic nonlinear wave equation	
Takamori Kato .....	105
Unconditional well-posedness of fifth order KdV type equations with periodic boundary condition	
Denny Ivanal Hakim and Yoshihiro Sawano .....	131
On the boundedness of certain elliptic operators in generalized Morrey spaces	
Soichiro Katayama .....	149
Global existence for a class of system of nonlinear wave and Klein-Gordon equations
