

Lie Group and Representation Theory Seminar

Date: February 23 (Wed), 16:30–17:30

Place: RIMS Room **202**

Speaker: Michel Duflo (Paris)

Title: Restrictions of discrete series of semisimple Lie groups

Abstract:

In this lecture, I will recall first the classification of discrete series representations of real algebraic Lie group, in the setting of the orbit method, and discuss related properties of Lie algebras. In the case of reductive groups, I will present some results on their restrictions to closed subgroup.
