Lie Group and Representation Theory Seminar

Date: September 14 (Tues), 2004, 16:30–17:30

Place: RIMS 402

Speaker: Eric Opdam (Amsterdam and RIMS)

Title: Harmonic analysis for affine Hecke algebras;

Abstract:

The study of the Plancherel decomposition of affine Hecke algebras is motivated by its role in the representation theory of p -adic reductive groups. I will give an overview of results concerning the Plancherel measure, the Schwartz algebra and the analytic R -groups. Then I will discuss some natural conjectures arising from this picture.
