PARTIAL DIFFERENTIAL EQUATIONS AND THEIR APPLICATIONS

研究集会報告集

1976.2.23 -- 2.25

目　　次

1. On the analyticity of solutions of partial differential equations 1
O. A. Oleinik
Moscow Univ.

2. Analyticity of solutions and boundary value problems in unbounded domains for parabolic systems 7
O. A. Oleinik
Moscow Univ.

3. Liouville and Phragmen-Lindelöf type theorems for elliptic and parabolic systems 16
O. A. Oleinik
Moscow Univ.

4. Le problème de Cauchy à Caractéristiques Multiples
— Méthode directe de trouver la condition (généralisée)
de E. E. Levi — 20

Yujiro OHYA

Faculté des Sciences Techniques
Université de Kyote

5. Hypoellipticity for the second order partial
differential equations 25

Tadato Matsuzawa

Department of Mathematics
Nagoya University

6. Finite element methods applied to parabolic equations.. 35

Hiroshi FUJITA

Department of Mathematics
University of Tokyo

7. The support of diffusion process and controllability
problem 36

Hiroshi Kunita

Department of Mathematics
Nagoya University

8. Parametrices for Degenerate Operators of Grushin's Type
..... 37

Chisato Tsutsumi

Department of Mathematics
Osaka University
