半群論 セミナー

京都大学数理解析研究所

1977年3月

SEMINAR ON SEMIGROUP THEORY

(November 9-11, 1976)

研究代表者 齋藤 亨

TABLE OF CONTENTS

1. S. Nakajima, The endomorphism semigroup of a semigroup and its application,	1
2. R. Yoshida, Certain right regular bands,	9
3. T. Saitô, Archimedean classes in an ordered semigroup IV,	20
4. T. Imaoka, Free products with amalgamation of orthodox semigroups,	40
5. M. Yamada, Orthodox semigroups on which Green's relations are compatible I. H-compatible orthodox semigroups,	56
6. K. Shoji and M. Yamada, Orthodox semigroups on which Green's relations are compatible II,	65
7. J. Kastl, One method of representations of inverse semigroups,	73
8. Y. Kobayashi, On extending functionals on commutative semigroups,	90
9. T. Tamura, Commutative subarchimedean semigroups,	98
10. K. Numakura, Topics on open prime ideals in compact semigroups,	127
11. T. Fujiwara, On implicational classes of structures,	138
12. K. Murata and K. Shirai, On divisor theory of an archimedean lattice-ordered semigroups,	160
13. K. Murata, On decomposition of lattice ideals of a lattice-ordered semigroup,	168
