

数理解析研究所講究録 773

Special Differential  
Equations

京都大学数理解析研究所

1991年12月

特殊微分方程式

研究集会報告集

1991年 9月 2日 - 5日

研究代表者 吉田 正章 (Masaaki Yoshida)

### Contents

1. Alexeevski, A.V. : Combinatorial invariants of $\mathcal{G}$ -manifolds . . . . .	1
2. Baldassarri, F. : Algebraic versus rigid cohomology with logarithmic coefficients: the 1-dimensional example . . . . .	7
3. Beukers, F. : $G$ -functions . . . . .	22
4. Holzapfel, R.-P. : A special fuchsian system connecting some Hilbert problems . . . . .	28
5. Retakh, V.S. (with Gelfand, I.M. and Graev, M.I): Recent developments in the theory of general hypergeometric functions . . . . .	53
6. Sato, T. : A differential equation associated with the Horrocks-Mumford bundle . . . . .	59
7. Sekiguchi, J. : Appell hypergeometric function $F_2(a, b, b'; c, c'; x, y)$ and the blowing up space of $P^2$ . . . . .	66
8. Stienstra, J. : Monodromy of $p$ -adic solutions of Picard-Fuchs equations . . . . .	78
9. Sturmfels, B. : Asymptotic analysis of toric ideals . . . . .	87
10. Wolfart, J. : Hypergeometric functions and modular embeddings . . . . .	96
11. Zelevinsky, A.V. : Chow polytopes . . . . .	106
