研究集会報告集

2000年 6月26日～6月28日  
研究代表者 鈴木 貴 (Takashi Suzuki)  
副代表者 柴田 徹太郎 (Tetsutaro Shibata)

目次

*. Preface	
菊池紀夫先生略歴および業績リスト	
	鈴木 貴 (Takashi Suzuki)
1. On Multiple Positive Solutions of Semilinear Elliptic Equations in $\mathbf{R}^n$ -----1	
Yonsei Univ.	Soohyun Bae
2. D - N 型混合境界条件をもつ弾性体方程式の解の正則性について-----12	
金沢大・理	林田 和也 (Kazuya Hayasida)
3. On the projection which appears in the variational treatment of elasto-plastic torsion problem-----24	
芝浦工大・システム工	井戸川 知之 (Tomoyuki Idogawa)
4. EXPONENTIALLY GROWING SOLUTIONS, THE INVERSE CONDUCTIVITY PROBLEM AND THE CAUCHY PROBLEM-----38	
群馬大・工	池島 優 (Masaru Ikehata)
5. Multiple Solutions for Singularly Perturbed Semilinear Elliptic Problems in Bounded and Unbounded Domains-----52	
早稲田大・理工	石渡 通徳 (Michinori Ishiwata)
6. Inertial Sets for Phase Transition Models Induced by the Variational Principles-----62	
岐阜大・工	伊藤 昭夫 (Akio Ito)
7. Bounded Palais-Smale Sequences in Minimax Theorems and Applications to Bifurcation Theory-----80	
Univ. de Franche-Comté	Louis Jeanjean
8. KNESER FAMILIES IN SEMILINEAR PARABOLIC PARTIAL DIFFERENTIAL EQUATIONS-----87	
東北学院大	上之郷 高志 (Takashi Kaminogo)
9. Constructing gradient flows for quasiconvex functionals-----92	
静岡大・工	菊地 光嗣 (Koji Kikuchi)

1 0.	Vortex State of d-Wave Superconductors in the Ginzburg-Landau Energy-----	110
	Courant Institute of	
	Mathematical Sciences	FangHua Lin
	Chung-Cheng Univ.	Tai-Chia Lin
1 1.	ON A HÖLDER REGULARITY OF GRADIENTS FOR EVOLUTIONAL P-LAPLACIAN SYSTEMS-----	123
	電通大・電気通信	三沢 正史 (Masashi Misawa)
1 2.	Bang-Bang Principle in Parameter Identification Problems-----	135
	神戸大・工	中桐 信一 (Shin-ichi Nakagiri)
1 3.	Concentration Behavior of Blow-up Solutions for a Simplified System of Chemotaxis-----	140
	広大・理学	永井 敏隆 (Toshitaka Nagai)
	宮崎大・工	仙葉 隆 (Takasi Senba)
	阪大・理学	鈴木 貴 (Takashi Suzuki)
1 4.	On the discrete Morse flow as a numerical tool-----	177
	金沢大・理	小俣 正朗 (Seiro Omata)
	金沢大・理	木南 伸一 (Shinichi Kinami)
1 5.	Regularity of Solutions to Some Variational Inequalities for the Stokes Equations-----	182
	国際高等研	齊藤 宣一 (Norikazu Saito)
1 6.	SMOOTHNESS AND DISCONTINUITIES OF WEAK SOLUTIONS TO PARABOLIC SYSTEMS-----	194
	Charles Univ.	J. Stará
	Charles Univ.	O. John
1 7.	Multiple solutions of inhomogeneous $H$ -systems with zero Dirichlet boundary conditions-----	199
	東工大・理	高橋 太 (Futoshi Takahashi)
1 8.	Mini-Maximizers for Reaction-Diffusion Systems with Skew-Gradient Structure-----	210
	東北大・理学	柳田 英二 (Eiji Yanagida)

This is Kokyuroku based on the talks of RIMS symposium on Variational Problems and Related Topics during June 26-28, 2000. The meeting was initiated by Professor Norio Kikuchi of Keio University in 1989 to promote research activities of this area in Japan. He has also organized it several times by himself, and many remarkable studies on nonlinear pde, differential geometry, and mathematical physics have been reported there. He is sixties years old this year, and it is our pleasure to dedicate this volume to him.

I very look forward to meet those excellent specialists working on variational problems, every year at Research Institute of Mathematical Science (RIMS) in Kyoto. I hope that this meeting continues and our variational community develops in future.

Takashi SUZUKI  
Osaka University

## 菊池紀夫先生略歴および業績リスト

昭和40年 4月 神戸大学助手 (理学部)  
昭和44年 4月 神戸大学講師 (理学部)  
昭和47年 1月 神戸大学助教授 (理学部)  
昭和49年10月 慶應義塾大学助教授 (工学部)  
昭和54年 4月 慶應義塾大学教授 (理工学部)

1. (with S. Aizawa) A mixed initial and boundary-value problem for the Hamilton-Jacobi equation in several space variables, Funkcial. Ekvac. 9(1966), 139-150
2. Control problems of contingent equations, Publ. RIMS, Kyoto Univ. Ser. A. 3(1967), 85-99
3. On some fundamental theorems of contingent equations in connection with the control problems, Publ. RIMS, Kyoto Univ. Ser. A 3(1967), 177-201
4. On contingent equations satisfying the Caratheodory type conditions, Publ. RIMS, Kyoto Univ. Ser.A. 3(1968), 361-371
5. Contingent equation と制御問題 について I, Funkcial. Ekvac. (Japanese) 21(2) (1969), 1-41
6. Contingent equation と制御問題 について II, Funkcial. Ekvac. (Japanese) 22 (1970), 1-24
7. On control problems for functional-differential equations, Funkcial. Ekvac. 14(1971), 1-23
8. (with Y. Tomita) On the absolute continuity of multi-functions and orientor fields, Funkcial. Ekvac. 14(1971), 161-170
9. Contingent equation と制御問題, Sūgaku (Japanese) 24(4)(1972), 257-268
10. (with S. Nakagiri) An existence theorem of solutions of nonlinear integral equations, Funkcial. Ekvac. 15(1972), 131-138
11. (with S. Nakagiri) Kneser's property of solutions of nonlinear integral equations, Funkcial. Ekvac. 17(1974), 57-66
12. (with K. Hayashi & T. Kaminogou) The boundary layer equation  $x''' + 2xx'' + 2\lambda(1-x'^2) = 0$  for  $\lambda > -0.19880$ , Keio Eng. Rep. 28(9)(1975), 87-97
13. Kneser's property for  $\partial u/\partial t = \Delta u + \sqrt{u}$ , Keio Math. Sem. Rep.

3(1978), 45-48

14. A construction of solutions for a nonlinear differential equation, Keio Math. Sem. Rep. 4(1979), 55-59
15. On a construction of a solution for  $\partial u/\partial t = \phi(u'') - uu'$  with initial and boundary conditions, Keio Eng. Rep. 33(4) (1980), 37-48
16. On the nonlinear parabolic equation of Eells-Sampson and a harmonic mapping with boundary condition, Keio Math. Sem. Rep. 6(1981), 33-40
17. On a construction of a solution for  $\partial u/\partial t = \phi(u'')$  ( $\phi' \geq \lambda > 0, \phi(0) = 0$ ) with initial and boundary conditions, Keio Math. Sem. Rep. 7(1982), 11-20
18. A construction of a solution for  $\partial u/\partial t = a(\Delta u)$  ( $a \in C^1(-\infty, \infty), a(0) = 0, a' \geq 0$ ) with initial and boundary conditions of class  $C^{3+\alpha}$  ( $0 \leq \alpha \leq 1$ ), Ann. Math. Pure e Appl. (IV), 155 (1989), 261-269
19. (with M. Misawa) Campanato type estimates for solutions of difference elliptic partial differential equations with constant coefficients, Rend. Circ. Mat. Palermo Serie II XXXIX(1990), 91-131
20. An approach to the construction of Morse flows for variational functionals, In: Nematics-Mathematical and Physical Aspects, ed. J.M. Coron, J.M. Ghidaglia and E. Helein (Nato Adv. Sci. Inst. Ser. C: Math. Phys. Sci. 332, Kluwer Acad. Publ., Dordrecht-Boston-London)(1991), 195-198
21. Hölder estimates of solutions for difference differential equations of elliptic-parabolic type, Research Report, Keio University KSTS/RR-99/001(1992)
22. Kneser's property for a parabolic partial differential equation, Nonlinear Analysis, Theory, Method & Applications 20(3) (1993), 205-213
23. A method of constructing Morse flows to variational functionals, Nonlinear World 1(1994), 131-147
24. (with K. Hoshino) On a construction of weak solutions to linear hyperbolic partial differential systems with the higher integrable gradients, Zap. Nauchn. Semin. POMI 233(1996), 30-52
25. (with J. Haga) On the existence of the harmonic variational flow subject to the two-sided conditions, Zap. Nauchn. Semin. POMI 243(1997), 324-337
26. (with T. Kaminogou) Kneser's property and mapping degree to multi-valued Poincaré map described by a semilinear partial differential equation, Nonlinear World 4(4)(1997), 381-394
27. (K. Hoshino) Gehring theory for time discrete hyperbolic differential

- equations, *Coment. Math. Uni. Carolinae* 39,4(1998), 697-707
28. (K. Hoshino) Reverse hölder inequality for functions with discrete-time variable, *Dynamics of Continuous, Discrete and Impulsive Systems* 6(1999), 503-517
  29. (J. Haga) On the higher integrability of the gradients of the solutions to difference partial differential systems of elliptic-parabolic type, *Z. angew. Math. Phys.* 51(2000), 290-303
  30. Hölder estimates of solutions for difference differential equations of elliptic-parabolic type, *The Journal of Geometric Analysis* 10-3(2000), 525-538
