数理解析研究所講究録1210

# 自由境界問題

京都大学数理解析研究所

2001年5月

## Preface

This volume contains the proceedings of the lectures delivered at the conference, *Free Boundary Problems*, held at the Research Institute for Mathematical Sciences, Kyoto University, during October 10–13, 2000. Most of the lectures concerned the free boundary problems in mathematical sciences and related topics in partial differential equations.

The conference was possible by support from the Research Institute for Mathematical Sciences. Also, financial support from the Japan Society for the Promotion of Science through its Grants-in-Aid for Scientific Research was helpful for making the conference successful. We wish to thank the Research Institute for Mathematical Sciences and the Japan Society for the Promotion of Science for their support and all those who cooperated to publish this volume.

Yoshikazu Giga (Hokkaido University)
Hitoshi Ishii (Waseda University)
Nobuyuki Kenmochi (Chiba University)

# 自由境界問題
# Free Boundary Problems
# 研究集会報告集

２０００年１０月１０日～１０月１３日

研究代表者　石井　仁司(Hitoshi Ishii)
副代表者　儀我　美一(Yoshikazu Giga)
〃　剣持　信幸(Nobuyuki Kenmochi)

目　次

１．A reaction-diffusion system approximation----------1
龍谷大・理工　二宮　広和(Hirokazu Ninomiya)
２．A CONTROL PROBLEM FOR A THERMOELASTIC SYSTEM IN SHAPE MEMORY MATERIALS----------8
Polish Academy of Sciences　Irena Pawłow
〃　Antoni Żochowski
３．A free boundary problem of wave equation----------24
金沢大・理　小俣　正朗(Seiro Omata)
〃　木南　伸一(Shin-ichi Kinami)
４．Geometric Variational Problems Arising in Reaction-Diffusion Systems----------29
広大・理学　坂元　国望(Kunimochi Sakamoto)
Moscow State Univ.　Nikolay N. Nefedov
５．Three phase boundary motion by surface diffusion----------43
九大・数理学　伊藤　一男(Kazuo Ito)
National Tsing Hua Univ.　高坂　良史(Yoshihito Kohsaka)
６．The Curve Shortening Flow — The Classical Approach----------54
Chinese Univ. of Hong Kong　Kai-Seng Chou
７．Modeling of Grain Structure Evolution----------68
北大・電子科学研　小林　亮(Ryo Kobayashi)
８．Stationary solutions of a bistable equation with clustering layers and spikes----------78
早大・理工　中島　主恵(Kimie Nakashima)
９．MATHEMATICAL MODELS OF BONE REMODELING AND NUMERICAL SIMULATIONS ON CAD SYSTEMS----------91
広島市大・情報科学　松浦　義則(Yoshinori Matsuura)
中央大・理工　大春　愼之助(Shinnosuke Oharu)
０．Asymptotic shape of a free-boundary arising in elliptic boundary value problem with non-homogeneous linearity----------99
都立大・理学　柴田　将敬(Masataka Shibata)

１１．On numerical methods for analysis of chaotic phenomena in free boundary problems---115
徳島大・工　今井　仁司(Hitoshi Imai)
〃　竹内　敏己(Toshiki Takeuchi)
１２．A phase field system with memory : global existence----------129
Technion-Israel Inst. of Tech.　Amy Novick-Cohen
１３．The Modified Crystalline Stefan Problem : Evolution of Broken Facets----------142
Warsaw Univ.　Piotr Rybka
１４．Shocks and very strong vertical diffusion----------156
北大・理　儀我　美一(Yoshikazu Giga)
１５．Some models for shape memory alloys----------167
岐阜大・教育　愛木　豊彦(Toyohiko Aiki)
千葉大・教育　剣持　信幸(Nobuyuki Kenmochi)
１６．Numerical Methods for Computing Discontinuous Solutions of a Class of Hamilton-Jacobi Equations Using a Level Set Method----------179
UCLA　Yen-Hsi Richard Tsai
北大・理　儀我　美一(Yoshikazu Giga)
UCLA　Stanley Osher
