Viscosity Solution Theory of Differential Equations and its Developments

April, 2006

Research Institute for Mathematical Sciences

Kyoto University, Kyoto, Japan
Preface

This volume contains the proceedings of the lectures delivered at the conference, *Viscosity Solution Theory of Differential Equations and its Developments*, held at the Research Institute for Mathematical Sciences, Kyoto University, during June 29 - July 1, 2005. All the papers are concerned with recent developments in the theory of viscosity solutions and related topics in nonlinear partial differential equations.

The conference was possible by support from the Research Institute for Mathematical Sciences. Also, financial support from the Japan Society for the Promotion of Science through its Grant-in-Aid for Scientific Research was helpful for making the conference successful. I wish to thank the Research Institute for Mathematical Sciences and the Japan Society for the Promotion for their support and all those who cooperated to publish this volume.

Shigeaki Koike (Saitama University)
Hitoshi Ishii (Waseda University)
Yoshikazu Giga (University of Tokyo)
March, 2006
1. THE NEUMANN PROBLEM FOR THE $\infty$-LAPLACIAN  
   Univ. of Pittsburgh  
   Juan J. Manfredi  

2. Rate of convergence of the Bence-Merriman-Osher algorithm for motion 
   by mean curvature  
   神戸大・海事科学  
   石井 克幸(Katsuyuki Ishii)  

3. Homogenization of fully nonlinear PDEs and backward SDEs  
   阪大・基礎工学  
   市原 直幸(Naoyuki Ichihara)  

4. A representation formula for solutions of Hamilton-Jacobi equations  
   早大・理工学  
   三竹 大寿(Hiroyoshi Mitake)  

5. HJB equations in Hilbert spaces related to optimal control of 
   stochastic Navier-Stokes equations  
   Georgia Inst. of Tech.  
   Andrzej Święch  

6. STRONG COMPARISON PRINCIPLE OF SEMICONTINUOUS VISCOSITY 
   SOLUTIONS TO SOME NONLINEAR ELLIPTIC EQUATIONS  
   徳島大・総合科学  
   大沼 正樹(Masaki Ohnuma)  

7. On the convergence of a three-dimensional crystalline motion to 
   Gauss curvature flow  
   東京理大・理工  
   牛島 健夫(Takeo K. Ushijima)  
   東大・数理科学  
   柳下 浩紀(Hiroki Yagisita)  

8. Interior $C^{\alpha}$ regularity for fully nonlinear elliptic equations  
   ICREA / Univ. Politècnica de Catalunya  
   Xavier Cabré  

9. A note on asymptotic solutions of Hamilton-Jacobi equations  
   早大・理  
   藤田 安啓(Yasuhiro Fujita)  

10. A generalization of a curvature flow of graphs on $\mathbb{R}$  
    北大・理学  
    三上 敏夫(Toshio Mikami)
1. A note on demi-eigenvalues for uniformly elliptic Isaacs operators .......................... 106
   吉村 康宏(Yasuhiro Yoshimura)

2. Some results on Hessian measures for non-commuting vector fields ......................... 115
   Australian National Univ. Neil S. Trudinger

3. NOTE ON THE MODICA-MORTOLA FUNCTIONAL ................................................... 119
   利根川 吉廣(Yoshihiro Tonegawa)

4. THE MAXIMUM PRINCIPLE FOR VECTOR FIELDS ..................................................... 125
   Univ. of Pittsburgh Juan J. Manfredi

5. ASYMPPTOTIC SOLUTIONS OF HAMILTON-JACOBI EQUATIONS IN THE WHOLE EUCLIDEAN SPACE ................................................................. 134
   石井 仁司(Hitoshi Ishii)
