The second Japanese-Australian Workshop
on Real and Complex Singularities
The second Japanese-Australian Workshop on Real and Complex Singularities

August, 2008

Research Institute for Mathematical Sciences

Kyoto University, Kyoto, Japan

This is a report of research done at the Research Institute for Mathematical Sciences, Kyoto University. The papers contained herein are in final form and will not be submitted for publication elsewhere.
Preface

These 10 years a lot of joint researches have been done by Australian and Japanese singularitists, in particular, in the field of Real Analytic Singularities. Based on this connection, the First Australian-Japanese Workshop on Real and Complex Singularities was held at the University of Sydney, Australia, in September 2005. Following the first workshop, the Second Japanese-Australian workshop was held at Research Institute for Mathematical Sciences (RIMS), Kyoto University, Japan, in November 2007. This volume is the Proceedings of the second workshop.

The workshop was supported by Grant-in-Aid for Scientific Research (No. 17204007), Japan Society for the Promotion of Science, and RIMS Project. We would not have been able to accept many mathematicians from overseas without their assistance. We would like to take this opportunity to express our gratitude to the investigator of the grant, Professor Shigenori Matsumoto, and the Research Institute. There were 43 participants, mostly from Australia, Europe and Japan. We would like to thank also the participants for their cooperation.

We are going to hold the third Australian-Japanese Workshop on Singularities in Australia next year (September 2009). We hope many mathematicians will participate in it from Japan and Australia, and also from other countries.

July 2008

Satoshi Koike
The second Japanese-Australian Workshop on Real and Complex Singularities
at Room 420
Research Institute of Mathematical Sciences (RIMS), Kyoto University
organised by
Satoshi Koike (Hyogo University of Teacher Education),
Toshizumi Fukui (Saitama University),
Laurentiu Paunescu (University of Sydney), and
Adam Harris (University of New England).

PROGRAMME

26th November (Monday)

9:30 – 10:30 Kentaro Saji (Hokkaido University, Japan)
Singularities of de Sitter horocyclic surfaces

10:45 – 11:45 Shyuichi Izumiya (Hokkaido University, Japan)
Flat lightlike hypersurface in Minkowski space

13:15 – 14:15 Adam Harris (University of New England, Australia)
Higher analytic cohomology and the Laplace-Beltrami
operator near an isolated singularity

14:45 – 15:45 Vyacheslav Sedykh (Russian State Gubkin University of Oil and Gas, Russia)
The coexistence of real corank 1 singularities
and the contact geometry of space curves

16:00 – 17:00 Goo Ishikawa (Hokkaido University, Japan)
Local classification of varieties in the symplectic space

27th November (Tuesday)

9:30 – 10:30 Jim Ward (University of Sydney, Australia)
Lines on a cubic surface

10:45 – 11:45 Carles Biviá-Ausina (Universitat Politecnica de Valencia, Spain)
Mixed multiplicities of ideals and the effective computation
of Lojasiewicz exponents of complex analytic maps
13:15 – 14:15  Alexander Esterov (Independent University of Moscow and University of Toronto, Russia and Canada)
Poincaré-Hopf indices and Newton polyhedra

14:45 – 15:45  Mutsuo Oka (Tokyo University of Science, Japan)
Topology of linear system of plane curves

16:00 – 17:00  Tzee-Char Kuo (University of Sydney, Australia)
Arc Space, Morse Stability, Equi-singularities

18:30 – Conference dinner

28th November (Wednesday)

9:30 – 10:30  Osamu Saeki (Kyushu University, Japan)
Cobordism of Morse maps and its application to map germs

10:45 – 11:45  Boldizsár Kalmár (Kyushu University, Japan)
Fold maps, immersions and cobordism

13:00 – 14:00  Minoru Yamamoto (Kurume National College of Technology, Japan)
On pseudo-immersions of a surface into the plane

14:10 – 15:10  Ruibin Zhang (University of Sydney, Australia)
Representations of Quantum Groups and Cohomology of Quantum Equivariant Vector Bundles

15:15 – Free discussion at Shisendo and night view of Kyoto

29th November (Thursday)

9:30 – 10:30  Takashi Nishimura (Yokohama National University, Japan)
An upper bound for multiplicities of co-rank one simple singularities

10:45 – 11:45  Michael Eastwood (University of Adelaide, Australia)
Singularities of semiconformal mappings

13:15 – 14:15  Alex Dimca (Université de Nice, France)
Characteristic and resonance varieties

14:45 – 15:45  Adam Parusiński (Université d’Angers, France)
Equivalence relations of two variable real analytic function germs

16:00 – 17:00  Laurentiu Paunescu (University of Sydney, Australia)
Tame nonsmooth inverse mapping theorems
List of participants

Takao Akahori (University of Hyogo, Japan)
Carles Bivià Ausina (Universitat Politècnica de València, Spain)
Liang Chen (Northeast Normal University, China)
Alexandru Dimca (Université de Nice, France)
Michael Eastwood (University of Adelaide, Australia)
Alexander Esterov (University of Toronto, Canada)
Hiroshi Fujimoto (University of Kobe, Japan)
Takuo Fukuda (Nihon University, Japan)
Toshizumi Fukui (Saitama University, Japan)
Adam Harris (University of New England, Australia)
Jonathan Hillman (University of Sydney, Australia)
Goo Ishikawa (Hokkaido University, Japan)
Hirotada Ito (Kinki University, Japan)
Shuzo Izumi (Kinki University, Japan)
Shuichi Izumiya (Hokkaido University, Japan)
Boldizsár Kalmár (Kyushu University, Japan)
Masayuki Kawashima (Tokyo University of Science, Japan)
Yumiko Kitagawa (Osaka City University, Japan)
K. Kitazaki (Japan)
Satoshi Koike (Hyogo University of Teacher Education, Japan)
Tzee-Char Kuo (University of Sydney, Australia)
Takayasu Kuwata (Tokyo Denki University, Japan)
Kimio Miyajima (Kagoshima University, Japan)
Takashi Nishimura (Yokohama National University, Japan)
Kumi Obata (Kinki University, Japan)
Mutsuo Oka (Tokyo University of Science, Japan)
Adam Parusiński (Université d’Angers, France)
Laurentiu Paunescu (University of Sydney, Australia)
Osamu Saeki (Kyushu University, Japan)
Kentaro Saji (Hokkaido University, Japan)
Kazuhiro Sakuma (Kinki University, Japan)
Vyacheslav Sedykh (Russian State Gubkin University of Oil and Gas, Russia)
Shinichi Tajima (Niigata University, Japan)
Masatomo Takahashi (Muroran Institute of Technology, Japan)
Tadashi Takahashi (Kobe University, Japan)
Susumu Tanabe (Kumamoto University, Japan)
Masamichi Takase (Shinshu University, Japan)
James N. Ward (University of Sydney, Australia)
Tadayuki Watanabe (Kyoto University, Japan)
Yuuki Yamaguchi (Kinki University, Japan)
Minoru Yamamoto (Kurume National College of Technology, Japan)
Shoji Yokura (Kagoshima University, Japan)
Ruibin Zhang (University of Sydney, Australia)
The second Japanese-Australian Workshop on Real and Complex Singularities
第二回日豪・複素特異点研究集会
RIMS 研究集会報告集

2007年11月26日～11月29日
研究代表者 小池 敏司 (Satoshi Koike)
副代表者 福井 敏純 (Toshizumi Fukui)

目次

1. Singularities of Semiconformal Mappings .................................................. 1
   U. Bretagne Occidentale Paul Baird
   U. Adelaide Michael Eastwood

2. ON THE CONNECTIVITY OF SOME COMPLETE INTERSECTIONS .......................... 11
   U. Nice Sophia Antipolis Alexandru Dimca

3. Orientability of real resultant singularities .................................................. 18
   Independent U. Moscow / U. Toronto A. I. Esterov

4. ON INJECTIVITY OF TAME MAPPINGS ......................................................... 29
   埼玉大・理(Saitama U.) 福井 敏純(Toshizumi Fukui)
   U. Savoie Krzysztof Kurdyka
   U. Sydney Laurentiu Paunescu

5. A REMARK ON \( \tilde{\alpha} \) - COHOMOLOGY WITH SUPPORTS
   IN THE COMPLEMENT OF A CONE SINGULARITY ........................................... 32
   U. New England Adam Harris
   Masaryk U. Martin Kolár

6. Local classification of varieties in the symplectic space .................................. 38
   北大・理学(Hokkaido U.) 石川 剛郎(Goo Ishikawa)

7. Lightlike hypersurfaces in Lorentz-Minkowski space .................................... 51
   北大・理学(Hokkaido U.) 泉屋 周一(Shyuichi Izumiya)

8. PONTRYAGIN-THOM-SZÜCS TYPE CONSTRUCTION FOR NON-POSITIVE
   CODIMENSIONAL SINGULAR MAPS WITH PRESCRIBED
   SINGULAR FIBERS ..................................................................................... 66
   九大・数理学(Kyushu U.) Boldizsár Kalmár

9. THE ENRICHED RIEMANN SPHERE AND STABILITY ....................................... 80
   U. Sydney Tzee-Char Kuo

10. A method to investigate \( TA(f), TL(f) \) and its applications ......................... 84
    横浜国大・教育人間科学(Yokohama Nat. U.) 西村 尚史(Takashi Nishimura)

- i -
11. COBORDISM OF MORSE MAPS AND ITS APPLICATION TO MAP GERMS ----- 100
    九大・数理学(Kyushu U.)                 佐伯 修(Osamu Saeki)
12. Koenderink type theorems for fronts ------------------------------------ 114
    岐阜大・教育(Gifu U.)                   佐治 健太郎(Kentaro Saji)
13. On pseudo-immersions of a surface into the plane ---------------------- 121
    久留米工業高専(Kurume Nat. Coll. Tech.) 山本 稔(Minoru Yamamoto)
