

数理解析研究所講究録 1881

Nonlinear Partial Differential Equations,  
Dynamical Systems and Their Applications

京都大学数理解析研究所

2014年4月

数理解析研究所講究録は、京都大学数理解析研究所の共同利用研究集会および共同研究の記録として1964年に刊行が開始されました。現在の共同利用・共同研究拠点（2010年発足）の前身である、全国共同利用研究所として当研究所が発足した翌年のことでしたが、以来半世紀、毎年数十巻を刊行し、2012年には第1800巻が刊行されるに至りました。第1巻から第1840巻までに収録された論文数は26,808編、総頁数は317,199頁という膨大なものであり、最先端の数学・数理科学分野の研究状況を伝えるのみならず、我が国の数学・数理科学の発展の歴史を留める文献として、他に類例を見ない論文集となっています。

講究録の内容は当研究所のウェブサイトおよび京都大学の学術情報リポジトリにおいても公開され、年間の総アクセス数は1,254,383回（2012年度）を数えるなど、多数の方にご利用いただいています。

講究録の使用言語は論文著者の判断に任されていますが、結果的に日本語が多用されていることが特徴の一つとなっています。その結果、講究録は、数学・数理科学の広い領域における最先端の専門知識に母国語でアクセスできるものとして、近年の英語化の流れの中で、重要な文献となりつつあります。

当研究所の共同利用事業に参加し講究録の論文を執筆していただいた多数の方々に対し、講究録を大きく成長させていただいたことを深く感謝いたしますとともに、これからも、当研究所の共同利用・共同研究拠点としての活動にご参加いただき、講究録の発展にご協力いただけますよう心よりお願い申し上げます。

*RIMS Kôkyûroku 1881*

*Nonlinear Partial Differential Equations,  
Dynamical Systems and Their Applications*

*September 3 ~6, 2012*

*edited by Masaharu Taniguchi*

*April, 2014*

*Research Institute for Mathematical Sciences*

*Kyoto University, Kyoto, Japan*

This is a report of research done at the Research Institute for Mathematical Sciences, Kyoto University. The papers contained herein are in final form and will not be submitted for publication elsewhere.

侯野博先生還曆記念祝賀会 2012.9.5 京都大学百周年時計台記念館  
in celebration of Professor Hiroshi Matano's 60th birthday

# Preface

This conference was held on September 3 - 6, 2012 at Research Institute for Mathematical Sciences, Kyoto University in honor of Professor Hiroshi Matano of The University of Tokyo on the occasion of his 60th birthday.

Scientific committee members and organizing committee members are as follows.

## Scientific Committee

Henri Berestycki (EHESS, Paris)  
Bernold Fiedler (Free University Berlin)  
David Kinderlehrer (Carnegie Mellon University)  
Yasumasa Nishiura (Tohoku University)  
Paul Rabinowitz (University of Wisconsin-Madison)  
Eiji Yanagida (Tokyo Institute of Technology)

## Organizing Committee

S. Seirin Lee (Hiroshima University)  
Yasuhito Miyamoto (The University of Tokyo)  
Tetsu Mizumachi (Kyushu University)  
Ken-Ichi Nakamura (Kanazawa University)  
Mitsunori Nara (Iwate University)  
Toshiyuki Ogawa (Meiji University)  
Toshiko Ogiwara (Josai University)  
Isamu Ohnishi (Hiroshima University)  
Yoshihito Oshita (Okayama University)  
Masahiko Shimojo (Okayama University of Science)  
Kazuhiro Takimoto (Hiroshima University)  
Masaharu Taniguchi (Okayama University)  
Takeo Ushijima (Tokyo University of Science)  
Hiroki Yagisita (Kyoto Sangyo University)  
Shigetoshi Yazaki (Meiji University)

We had 21 speakers and 117 participants. Many young graduate students helped this conference. We would like to thank all of them and hope that this proceedings will be helpful for future studies. (M. Taniguchi, K.-I. Nakamura)

# Nonlinear Partial Differential Equations, Dynamical Systems and Their Applications

–in honor of Professor Hiroshi Matano on the occasion of his 60th birthday–

Date: September 3(Mon) - 6(Thu), 2012

Place: Room 420, Research Institute for Mathematical Sciences, Kyoto University, JAPAN

## September 3 (Mon)

9:50 – 10:00      Opening

10:00 – 10:50      Paul Rabinowitz (Univ. Wisconsin-Madison / POSTECH)  
*On an Allen-Cahn model of phase transitions*

11:00 – 11:50      Shuichi Jimbo (Hokkaido University)  
*Domain variation and electromagnetic frequencies*

Lunch

14:00 – 14:50      Hisashi Okamoto (Kyoto University)  
*Pattern formation of the Kolmogorov flows at high Reynolds numbers*

15:00 – 15:50      Frank Merle (University of Cergy-Pontoise, IHES)  
*Global solution for three dimension critical wave equation*

16:10 – 17:00      Yoshihisa Morita (Ryukoku University)  
*Reaction-diffusion systems with conservation of mass*

## September 4 (Tue)

10:40 – 11:10      Toshiko Ogiwara (Josai University)  
*Convergence results in order-preserving dynamical systems and applications to a molecular motor system*

11:20 – 12:10      Jong-Shenq Guo (Tamkang University)  
*On a free boundary problem for a two-species weak competition system*

Lunch

14:00 – 14:50      Shin-Ichiro Ei (Kyushu University)  
*Dynamics of localized solutions for reaction-diffusion systems on two-dimensional domain*

15:00 – 15:50      Xing Liang (Univ of Science and Technology of China)  
*The spreading speeds for the integral operator without compactness*

16:10 – 17:00 Jaeyoung Byeon (POSTECH)  
*Variational construction of solutions with clustering multi-bumps for nonlinear elliptic problems*

September 5 (Wed)

9:30 – 10:20 Hiroshi Kokubu (Kyoto University)  
*Topological computation method for global dynamics and its application*

10:40 – 11:10 Toshiyuki Ogawa (Meiji University)  
*Triple degeneracy in 3-component reaction-diffusion system*

11:20 – 12:10 David Kinderlehrer (Carnegie Mellon University)  
*The role of entropy in the evolution of microstructural networks*

Lunch

14:00 – 14:50 Peter Polacik (University of Minnesota)  
*Symmetry and the nodal structure of nonnegative solutions of elliptic equations*

15:00 – 15:50 Marek Fila (Comenius University)  
*Rate of convergence to Barenblatt profiles for the fast diffusion equation*

16:10 – 17:00 Tadahisa Funaki (The University of Tokyo)  
*Stationary measures of the KPZ equation for growing interfaces with fluctuations*

September 6 (Thu)

9:30 – 10:20 Yihong Du (University of New England)  
*Regularity and long-time behavior of the free boundary in nonlinear Stefan problems*

10:30 – 11:20 Hirokazu Ninomiya (Meiji University)  
*Diffusion-induced bifurcations from the stationary solutions and infinity*

11:30 – 12:20 Bendong Lou (Tongji University)  
*A convergence result for a problem with free boundary conditions and its applications*

Lunch

14:00 – 14:50 Bernold Fiedler (Free University Berlin)  
*Reaction, advection, and diffusion on the circle*

15:00 – 15:50     Henri Berestycki (EHESS - Paris)  
                          *Propagation driven by a line in reaction-diffusion equations*

15:50                Closing

See <http://nlpde.w3.kanazawa-u.ac.jp/rims2012/> for the detailed information.

Nonlinear Partial Differential Equations, Dynamical Systems and Their Applications

非線形偏微分方程式, 力学系およびその応用

RIMS 研究集会報告集

2012年9月3日~9月6日

研究代表者 谷口 雅治 (Masaharu Taniguchi)

副代表者 中村 健一 (Ken-Ichi Nakamura)

目 次

1. A Note on Mountain Pass Solutions for a Class of Allen-Cahn Models ----- 1  
KAIST Jaeyoung Byeon  
U. Wisconsin-Madison Paul H. Rabinowitz
2. Domain variation and electromagnetic frequencies ----- 18  
北大・理学 (Hokkaido U.) 神保 秀一 (Shuichi Jimbo)
3. Global dynamics of energy critical focusing nonlinear wave equations ----- 31  
U. Cergy-Pontoise / IHÉS / European Research Council  
Frank Merle
4. Spectrum comparison in a system of reaction-diffusion equations with conservation  
property ----- 38  
龍谷大・理工 (Ryukoku U.) 森田 善久 (Yoshihisa Morita)
5. Convergence results in order-preserving dynamical systems and applications to  
a molecular motor system ----- 43  
城西大・理 (Josai U.) 荻原 俊子 (Toshiko Ogiwara)
6. A FREE BOUNDARY PROBLEM FOR A WEAK COMPETITION SYSTEM ----- 57  
Tamkang U. Jong-Shenq Guo
7. Dynamics of localized solutions for reaction-diffusion systems on two dimensional  
domain - Spot dynamics on curved surface - ----- 66  
九大・MI 研 (Kyushu U.) 栄 伸一郎 (Shin-Ichiro Ei)  
京産大・理 (Kyoto Sangyo U.) 柳下 浩紀 (Hiroki Yagisita)

8 . MATERIALS MICROSTRUCTURES: ENTROPY AND CURVATURE-DRIVEN COARSENING -----	71
Columbia U.	Katayun Barmak
Fraunhofer Austria Research GmbH	Eva Eggeling
George Mason U.	Maria Emelianenko
U. Utah	Yekaterina Epshteyn
Carnegie Mellon U.	David Kinderlehrer
Microsoft Corp.	Richard Sharp
Carnegie Mellon U.	Shlomo Ta'asan
9 . A discussion of nonnegative solutions of elliptic equations on symmetric domains -----	92
U. Minnesota	P. Poláčik
1 0 . Extinction of solutions of the fast diffusion equation -----	107
Comenius U.	Marek Fila
1 1 . Stationary measures of the KPZ equation -----	115
東大・数理科学 (U. Tokyo)	舟木 直久 (Tadahisa Funaki)
1 2 . SPREADING-VANISHING DICHOTOMY IN NONLINEAR STEFAN PROBLEMS -----	121
U. New England	Yihong Du
1 3 . Diffusion-induced bifurcations from the stationary solutions and infinity -----	134
明治大・総合数理 (Meiji U.)	二宮 広和 (Hirokazu Ninomiya)
1 4 . STURM GLOBAL ATTRACTORS OF HAMILTONIAN TYPE FOR SEMILINEAR PARABOLIC EQUATIONS -----	139
Inst. Superior Técnico	Carlos Rocha
Freie U. Berlin	Bernold Fiedler

講究録

Kôkyûroku

RIMS Kôkyûroku was started in 1964 as the proceedings of symposia, colloquia and workshops supported by RIMS, the Research Institute for Mathematical Sciences, Kyoto University. It was the next year of the establishment of RIMS as one of the nationwide Cooperative Research Centers, the preceding system of the current Joint Usage/Research Centers that started in 2010. For half a century since then, about 50 to 60 volumes have been issued each year, and the 1,800th volume was issued in 2012. The volumes of Kôkyûroku from the 1st through the 1,840th, containing enormous 26,808 articles and 317,199 pages, not only deliver the latest research activities in mathematics and mathematical sciences but also constitute valuable and incomparable collections of articles that pass down history of progress of mathematics and mathematical science in Japan.

Articles in Kôkyûroku are available on the websites of RIMS and Kyoto University Research Information Repository. They are very frequently accessed on the internet, with a total of as many as 1,254,383 accesses in 2012.

The authors choose the languages to write articles, and many are written in Japanese, which is one of the characteristics of Kôkyûroku. As a result, Kôkyûroku is regarded as a significant and important literature which allows easy access to the latest specialized knowledge in the large fields of mathematics and mathematical sciences written in native language for Japanese readers, while more and more research papers are being written in English in recent years.

We are deeply grateful to many of those who have participated in cooperative research activities of RIMS and greatly developed Kôkyûroku. We heartily ask for your continuous participation in research activities at RIMS as a Joint Usage Research Center and your warm support and cooperation for the fruitful development of Kôkyûroku.
