COMMENTS ON “THE ALGEBRAIC AND ANABELIAN GEOMETRY OF CONFIGURATION SPACES”

Shinichi Mochizuki

February 2015

(1.) The faithfulness referred to in the proof of Proposition 1.4 is well-known and may be verified, for “N” [cf. the notation of loc. cit.] sufficiently small, by applying a similar argument to the argument given in the proof of [DM], Lemma 1.14, i.e., by invoking the Lefshetz-Weil fixed point formula.

(2.) The subscripted “ξ’s” in the first two displays of the proof of Corollary 6.3 should, in fact, be superscripted.
