

INTRODUCTION TO INTER-UNIVERSAL TEICHMÜLLER THEORY, CONTINUED

YUICHIRO HOSHI

Contents

0. Introduction
1. Initial Θ -data and Hodge Theaters
2. Étale-like Objects, Frobenius-like Objects, and Kummer Isomorphisms
3. Multiradial Kummer Compatible Systems
4. Additive Symmetry of Hodge Theaters
5. Multiplicative Symmetry of Hodge Theaters
6. Processions
7. Review of Local Geometric Setting
8. Conjugate Synchronizations
9. Additive Symmetrizing Isomorphisms
10. Multiplicative Symmetrizing Isomorphisms
11. Log-links
12. Log-shells
13. Tensor Packets
14. Log-lines
15. Global Log-Kummer Correspondences
16. Mono-theta Systems
17. Theta Monoids
18. Multiradial Kummer-detachments of Theta Monoids
19. Galois-theoretic Evaluations of Theta Functions
20. Gaussian Monoids and Evaluation Isomorphisms
21. Global Gaussian Frobenioids
22. $\Theta^{\times\mu}$ -links and $\Theta_{\text{gau}}^{\times\mu}$ -links
23. Logarithmic Gaussian Procession Monoids
24. Log-Kummer Correspondences for theta values and $\Theta_{\text{LGP}}^{\times\mu}$ -links
25. $\Theta_{\text{LGP}}^{\times\mu}$ -link-compatible Multiradial Representations and the Consequences
26. Diophantine Inequality
