

MATHEMATICA PANNONICA

20/2 (2009)

CONTENTS

KÁTAI, I.: On the distribution of the square-full and k -full parts of integers for short intervals	149
KABZA, L.: A -groups and centralizers	159
VARTZIOTIS, D. and WIPPER, J.: Classification of symmetry generating polygon-transformations and geometric prime algorithms	167
PRAGER, W. and SCHWAIGER, J.: Generalized polynomials in one and in several variables	189
BUDZIK, D.: Monomial differences majorized by given functions	209
RADIĆ, M.: Certain relations concerning bicentric polygons and 2-parametric presentation of Fuss' relations	219
SEMENOV, P. V.: Transversal perturbations of convexity	249
KOMLÓSI, S.: On pseudolinear fractional functions – the implicit function approach	257
TSIRLIN, A. and KAZAKOV, V.: Optimal dispatch and pricing in deregulated electricity market	275
SZIDAROVSKY, F. and MATSUMOTO, A.: A special labor-managed oligopoly	291
Mathematica Pannonica Vol. 20 (2009). Contents	303
