

Call for Applications:

Proposals invited for Tandem-Workshop 2024 at MFO and RIMS

The Mathematical Research Institute Oberwolfach (MFO), Germany and the Research Institute for Mathematical Sciences (RIMS), Kyoto University, Japan invite proposals for a tandem-workshop taking place simultaneously in a **hybrid format** at MFO and RIMS in the week **22-28 September 2024**.

The workshop with up to 50 participants is held in both locations such that in each place there are 15-25 participants who can interact in the usual intense way locally and in addition share a certain number of joint lectures/discussions via zoom (for example Oberwolfach 8:30-12 am could match up with RIMS at 3:30-7 pm). Invitations of their suggested participants will be sent out by each center with their own standard procedure. Emphasis is on on-site participation at the centers, online participation is reserved to justified exceptions (weak pandemic assumed). Talks which are given outside this time slot can be recorded via zoom such they are also available to the participants at the other institute.

Applications should come with a team of at most four organisers including at least one organiser planning to attend in person for each location. It should contain:

- Title of the suggested tandem-workshop.
- Description of the topic and focus of workshop, recent results, references (4-6 pages).
- The proposed provisional program of the tandem-workshop taking into account the different time zones.
- List of 15-25 suggested participants at each center with names, gender info and affiliation planned for each center (i.e. 2 lists of intended invitees; please consider diversity issues of each center).
- Scientific cv of the organizers.

Please send proposals (preferably in one pdf-file) by email prior to the **deadline 31 August 2023** preferably to both of the directors of MFO and RIMS:

Prof. Kaoru Ono

Director RIMS
