

## Call for Applications:

### Proposals invited for MATRIX-RIMS Tandem Workshop 2024

The Australian Mathematical Research Institute MATRIX and the Research Institute for Mathematical Sciences (RIMS) invite proposals for a tandem workshop taking place simultaneously in a **hybrid format** at MATRIX and RIMS for one week in the period of **11-15 March 2024**.

The workshop is held simultaneously in both locations. At each institute about 20 participants are possible, who can interact in the usual intense way locally and in addition share a certain number of joint lectures/discussions via zoom. Talks given outside the 10am-5pm time slot can be recorded via zoom for viewing by participants at the other institute, but not publicly.

Applications should come with a team of about four organisers including at least two organisers planning to attend in person for each location. Organisers should aim for gender balance. The application should contain:

- Title of the suggested tandem workshop.
- Description of the topic and focus of workshop, recent results, references (4-6 pages).
- The proposed provisional program of the tandem workshop taking into account the different time zones.
- List of about 20 suggested participants at each institute with names, gender info and affiliation planned for each institute (i.e. two lists of intended invitees; please consider diversity issues of each institute).
- Publication lists of the organisers.

Please send proposals (pdf-files) by email to [tandem-workshop@kurims.kyoto-u.ac.jp](mailto:tandem-workshop@kurims.kyoto-u.ac.jp) and/or upload to the MATRIX website (<https://www.matrix-inst.org.au/call-for-programs/>) the prior to the **deadline 11 August 2023**:
