PREFACE

This brochure contains notes of all the lectures delivered at the "Seminar on Permutation Groups and Related Topics" which was held at RIMS (Research Institute for Mathematical Science) of Kyoto University, from January 10 to 13, 1977. This Seminar was organized by E. Bannai, H. Enomoto, H. Kimura and T. Oyama with co-organizers N. Iwahori, H. Nagao and T. Tsuzuku.

Though the Seminar was one of domestic research seminars sponsored by RIMS, we were able to have four participants from abroad Professors Peter M. Neumann, Jan Saxl, Cheryl E. Praeger, Chat-Tin Ho and Chang Choi, and we, Japanese participants, had chances to learn from them and to discuss with them in an informal atmosphere. We would like to express our thanks to them for their participation in the Seminar.

T. Tsuzuku

A copy of this brochure may be obtained by writing to RIMS.

SEMINAR ON PERMUTATION GROUPS AND RELATED TOPICS

研究代表者　都　筑　俊　郎

1977.1.10 ••• 13

目　　次

1. The simplicity of the Green heart ••••••••••• 1
Peter M. Neumann
(Queen's College, Oxford)

2. Tight spherical designs ••••••••••• 20
E. Bannai (学習院大・理)

3. On the spectra of certain distance-regular graphs ••• 25
E. Bannai (学習院大・理)
T. Ito (筑波大)

4. Finite groups admitting an automorphism of prime order
••••••••••• 30
H. Fukushima (北大・理)

5. On certain standard subgroups ••••••••••• 34
K. Gomi (東大・教養)
I. Miyamoto (筑波大)
H. Yamada (東大・理)

6. 2-factorization in finite groups ••••••••••• 39
M. Hayashi (愛知教育大)

7. On representation of R-elementary groups at 2 ••••••• 42
M. Hikari (慶応大)

8. On some 2-transitive groups in which the socle of the stabilizer of a point is nonsolvable ••••••••••• 48
Y. Hiramine (大阪教育大)

9. On the failure of the Thompson factorization in p-constrained groups ..... 51
Chat-Tin Ho
(Univ. of Brasilia)

10. Quadratic action and related topics ..... 54
Chat-Tin Ho
(Univ. of Brasilia)

11. On finite groups with exactly two real conjugate classes ..... 59
S. Iwasaki (一橋大)

12. On the number of conjugate classes of maximal subgroups in finite groups ..... 64
M. Kano (明石高専)

13. Representations of finite Chevally groups ..... 69
N. Kawanaka (阪大・理)

14. An inequality for finite permutation groups ..... 78
M. Kiyota (東大・理)

15. Blocks with an abelian defect group ..... 84
M. Kiyota (東大・理)

16. The commutativity of the radicals of group algebras ..... 90
S. Koshitani (筑波大)

17. On groups with an automorphism of prime order ..... 93
H. Matsuyama (阪大・理)

18. Dihedral-free groups ..... 96
M. Miyamoto (北大・理)

19. On groups generated by an involution and an element of order 3 ····· 98
H. Mizutani (北大・理)

20. On symmetric systems ····· 102
H. Nagao (阪大・理)

21. The Enumeration theorems under (permutation) group action and their application to combinatorial problems ····· 106
H. Narushima (東海大)

22. On the p-rationality of lifted characters ····· 118
Y. Nobusato (大阪市大・理)

23. On tight 4-designs ····· 122
R. Noda (阪大・教養)

24. Finite groups with inner subgroups ····· 124
K. Nomura (東工大)

25. On rank 5 primitive permutation groups which has two 2-transitive constituents ····· 128
M. Numata (阪大・理)

26. Classification of edge regular graphs in which the eigenvalue of the adjacency matrix are all $\geq -2$ ····· 131
M. Numata (阪大・理)

27. On the Schur indices of algebraic groups ····· 135
Z. Ohmori (都立大・理)

28. On Brauer correspondences ····· 140
T. Okuyama (北大・理)

29. Elements of prime order in primitive permutation groups ····· 143
Cheryl E. Praeger
(Univ. of Western Australia)

30. Doubly transitive but not doubly primitive permutation groups ..... 151
Cheryl E. Praeger
(Univ. of Western Australia)

31. Hecke rings over arbitrary fields ..... 154
H. Sawada （上智大・理）

32. Some problem on characters ..... 158
Jan Saxl
(Downing College, Cambridge)

33. Permutation groups of some special degrees ..... 161
Jan Saxl
(Downing College Cambridge)

34. Dimension subgroups ..... 182
K. Tahara （愛知教育大）

35. On blocks of defect 0 ..... 190
T. Wada （小樽商大）

36. Schur index and Schur subgroup ..... 196
T. Yamada （都立大・理）

37. Transfer theorems for cohomological G-functor ..... 201
T. Yoshida（北大・理）

38. On 2p-fold transitive permutation groups ..... 218
M. Yoshizawa（学習院大・理）
