

発展方程式とその周辺 – エネルギー構造と解の定量的解析 –
Evolution Equations and Related Topics – Energy Structures and Quantitative Analysis –
RIMS 共同研究（公開型）報告集

2023 年 10 月 2 日～ 10 月 4 日
研究代表者 赤木 剛朗 (Goro Akagi)
副代表者 深尾 武史 (Takeshi Fukao)

目次

1. Review of recent advances in bulk-surface Cahn-Hilliard systems with dynamic boundary conditions
Kei Fong Lam Hong Kong Baptist University
2. Global existence of weak solutions to a singular nonlocal phase field system with inertial term
来間 俊介 (Shunsuke Kurima) 東京理科大学 (Tokyo U. of Science)
3. Sharp interface limit for a rate function of large deviations with quasi non-linearity
可香谷 隆 (Takashi Kagaya) 室蘭工業大学 (Muroran Institute of Technology)
4. Relevances of the Möbius energy to harmonic maps
長澤 壯之 (Takeyuki Nagasawa) 埼玉大学 (Saitama U.)
5. Derivation of fractional diffusion equations from stochastic harmonic chains
須田 颯 (Hayate Suda) 東京科学大学 (Institute of Science Tokyo)
6. Global existence and large-time behavior of solutions to a 3D-model associated with grain boundary motion
渡邊 紘 (Hiroshi Watanabe) 大分大学 (Oita U.)
Salvador Moll Universitat de València
白川 健 (Ken Shirakawa) 千葉大学 (Chiba U.)
7. The existence of L^2 -normalized solutions in the L^2 -critical setting
生駒 典久 (Nori-hisa Ikoma) 慶應義塾大学 (Keio U.)
8. Positive solutions to stationary double power nonlinear Schrödinger equations
菊池 弘明 (Hiroaki Kikuchi) 津田塾大学 (Tsuda U.)

9. Qualitative analysis of space-time periodic homogenization for nonlinear
diffusion equations
岡 大将 (Tomoyuki Oka) 福岡工業大学 (Fukuoka Institute of Technology)

10. Solvability of the heat equation on a half-space with a dynamical boundary condition
and unbounded initial data
川上 竜樹 (Tatsuki Kawakami) 龍谷大学 (Ryukoku U.)
