

Sept. 07, 2021 ~ Sept. 10, 2021

Online via Zoom 4:30 - 9:30 PM (JST)

Inter-universal Teichmüller Theory Summit

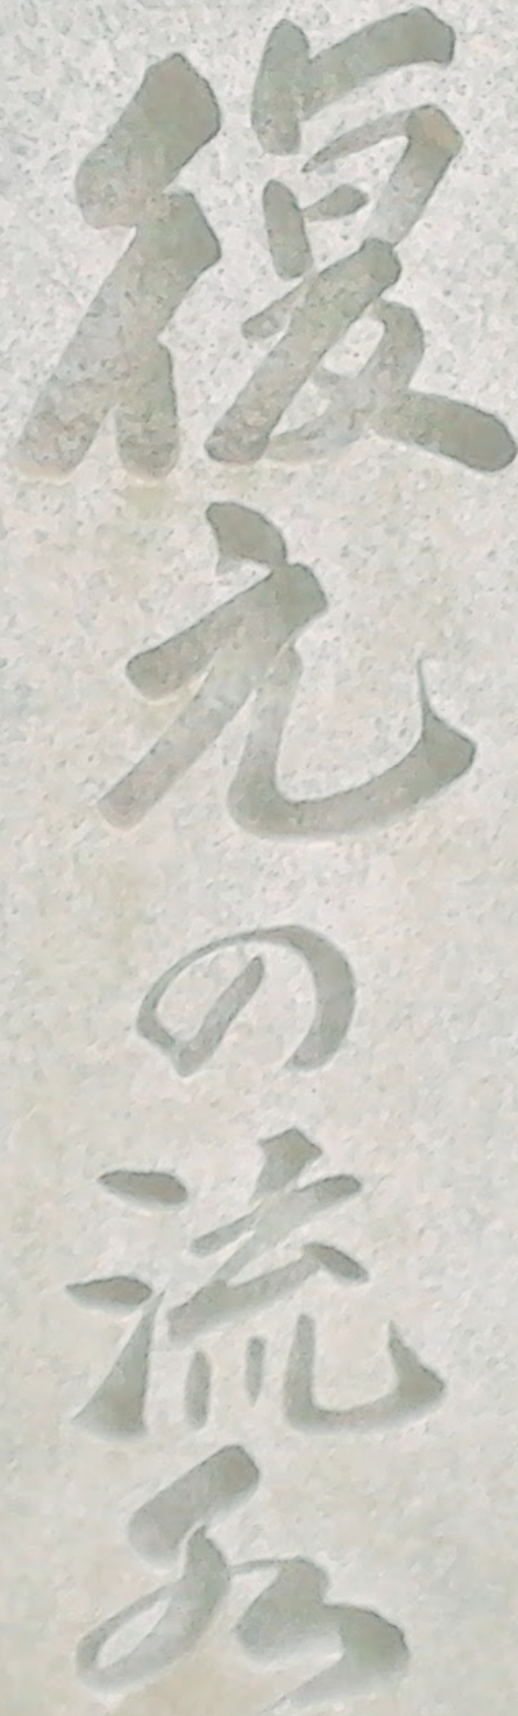

Y. Hoshi - RIMS Kyoto, JP

S. Mochizuki - RIMS Kyoto, JP

I. Fesenko - Nottingham, UK

Y. Taguchi - Tokyo, JP

B. Collas - RIMS Kyoto, JP

Speakers

Benjamin Collas

Ivan Fesenko

Yuichiro Hoshi

Arata Minamide

Shinichi Mochizuki

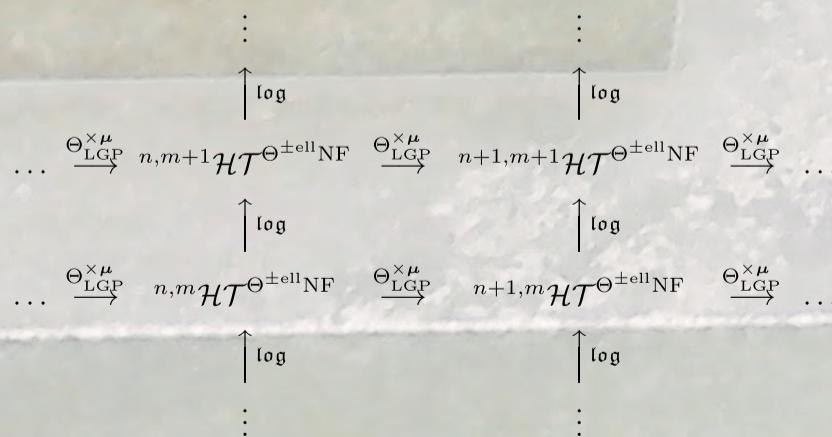

Wojciech Porowski

Christian Táfula Santos

Shota Tsujimura

Go Yamashita

※ Talks will focus on issues related to the exposition or formulation of the theory from a more advanced point of view, as well as on recent new research developments related to the theory.

※ This workshop will differ from previous workshops on inter-universal Teichmüller theory in that it will be directed primarily toward advanced learners of the theory, as well as researchers who have already acquired a thorough understanding of Inter-universal Teichmüller geometry.

One of four workshops in the special RIMS year “Expanding Horizons of Inter-universal Teichmüller Theory”.

Organizing Committee. S. Mochizuki (RIMS, Kyoto University) • Y. Hoshi (RIMS, Kyoto University) • I. Fesenko (Nottingham University) • Y. Taguchi (Tokyo Institute of Technology) • F. Kato (Tokyo Institute of Technology) • M. Kurihara (Keio University) • A. Shiho (University of Tokyo).

Supported by RIMS and EPSRC Programme Grant *Symmetries and Correspondences* Universities of Nottingham and of Oxford

For further information on all four workshops, consult: www.kurims.kyoto-u.ac.jp/~mochizuki/project-2021-english.html
